

32-8933: Recombinant Mouse Cytotoxic T-lymphocyte Protein 4(C-Flag)

Gene : Ctla4
Gene ID : 12477
Uniprot ID : P09793

Description

Source: Human cells.
MW :14.7kD.

Recombinant Mouse Cytotoxic T-lymphocyte Protein 4 is produced by our Mammalian expression system and the target gene encoding Ala37-Asp161 is expressed with a Flag tag at the C-terminus. Mouse Cytotoxic T-lymphocyte 4(CTLA-4,CD152), is a type I transmembrane T cell inhibitory molecule. Within the ECD, Mouse CTLA-4 shares 68% aa sequence identity with human. CTLA4 is similar to the T cell costimulatory protein CD28 since both of the molecules bind to CD80 and CD86 on antigen-presenting cells. CTLA4 transmits an inhibitory signal to T cells, whereas CD28 transmits a stimulatory signal. Intracellular CTLA4 is also found in regulatory T cells and may play an important role in their functions. T cell activation through the T cell receptor and CD28 leads to increased expression of CTLA4. Genetic variations of CTLA4 have been associated with susceptibility to systemic lupus erythematosus(SLE), Graves disease(GRD), Celiac disease type3(CELIAC3) and Hepatitis B virus infection(HBVinfection).

Product Info

Amount : 10 µg / 50 µg
Content : Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.
Storage condition : Lyophilized protein should be stored at -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at -20°C for 3 months.
Amino Acid : AIQVTQPSVVLASSHGVSFPCEYSPSHNTDEV RVTVLRQTNDQMTEVCATTFTEKNTVGFLDY PFCSGTFNESRVNLTIQGLRAVD TGLYLCKVELMYPPPYFVGMNGTQIYVIDPEPCPDSDDYKDDDDK

Application Note

Endotoxin : Less than 0.1 ng/Åµg (1 IEU/Åµg) as determined by LAL test.
