10-4194: Monoclonal Antibody to Rat NKp46 (Clone: WEN23)

Clonality: Monoclonal Clone Name: WEN23

Application: Functional Assay, IP, IHC, FACS, WB

Reactivity: Rat

Conjugate: Unconjugated

Gene : Ncr1
Gene ID : 117547.
Uniprot ID : Q9Z0H5
Format : Purified

Alternative Name: Natural cytotoxicity triggering receptor 1, Activating receptor 1, Lymphocyte antigen 94

homolog, NK receptor KILR-1, Natural killer cell p46-related protein, CD335

Isotype: Mouse IgG1, Kappa

Immunogen Information: Recombinant rat NKp46 ectodomain coupled to the Fc portion of mouse IgG2b was used as

the immunogen for this antibody.

Description

Rat NKp46 is an activating receptor expressed on all NK cells in all rat strains tested. NKp46 is the defining surface marker for rat NK cells. No expression of NKp46 has so far been reported on non-NK cells in the rat. NKp46 associates with the activating adaptor proteins FcepsilonRlgamma and CD3zeta and activates NK cell cytotoxicity and IFNgamma production.

Product Info

Amount: 25 μg / 100 μg

Purification: Protein G Chromatography

Content: $25 \mu g \text{ in } 50 \mu l/100 \mu g \text{ in } 200 \mu l \text{ PBS containing } 0.05\% \text{ BSA and } 0.05\% \text{ sodium azide. Sodium}$

azide is highly toxic.

Storage condition : Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid

repeated freeze and thaw cycles

Application Note

Facs analysis: 1-2 μ g/10^6 Cells, Western blot analysis: 1-2 μ g/ml, Immunoprecipitation: 1-2 μ g/ml
