

45-1028: Human IgG Control(Whole Molecule), Purified(Discontinued)**Clonality** : Polyclonal**Format** : Purified**Isotype** : Human IgG**Description**

Purified Human IgG (Whole Molecule) Control is purified from normal human serum through Protein G chromatography. Purified Human IgG (Whole Molecule) Control can be used as control, standard, blocking agent, or coating protein in a variety of assays, including ELISA, immunoblotting (Western and Dot blots), immunoprecipitation, immunodiffusion, and immunoelectrophoresis. It may also be used as antigen or ligand in immunochemical conjugation reactions.

Product Info**Amount** : 4.0 mg**Purification** : Protein G chromatography**Content** : 4 mg/ml, lyophilized with PBS, pH 7.4, containing 0.02% sodium azide**Storage condition** : The antibody is stable in lyophilized form if stored at -20°C or below. The reconstituted antibody can be stored for 2-3 weeks at 2-8°C. For long term storage, aliquot and store at -20°C or below. Avoid repeated freezing and thawing cycles.**Application Note**

Reconstitute the lyophilized antibody with deionized water (or equivalent) to a final concentration of 4 mg/ml.
