45-1044: Rabbit Polyclonal Antibody to Lamin A+C(Discontinued)

Clonality: Polyclonal Application: **ELISA**

Reactivity: Mouse, Human

Gene: **LMNA** Gene ID: 4000 P02545 **Uniprot ID:** Format: Purified

Alternative Name: Lamin A/C antibody, Renal carcinoma antigen NY-REN-32

Isotype: Rabbit IgG

Immunogen Information: KLH-coupled synthetic peptide within residues 400-450 of human Lamin A.

Description

Lamins are structural protein components of the nuclear lamina which contains 3 members: Lamin A, B and C in mammalian cells. Lamin A and lamin C are generated by alternative splicing from the same gene and share complete identity for the first 566 amino acids. Lamin A interacts with transcription factor SREBP1 via its C-terminal domain. The lamin A/C deficiency is probably associated with both defective nuclear mechanics and impaired transcriptional activation. The lamin A/C is cleaved by caspase-6 and serves as a marker for caspase-6 activation. Rabbit Anti-Lamin A+C Polyclonal Antibody is developed in rabbit using a KLH-coupled synthetic peptide within residues 400-450 of human Lamin A (Swiss Prot: P02545).

Product Info

Amount: 100 µg

Purification: Immunoaffinity chromatography

Content: 0.5 mg/ml, lyophilized with PBS, pH 7.4, containing 0.02% sodium azide

The antibody is stable in lyophilized form if stored at -20°C or below. The reconstituted antibody Storage condition:

can be stored for 2-3 weeks at 2-8°C. For long term storage, aliquot and store at -20°C or below.

Avoid repeated freezing and thawing cycles.

Application Note

ELISA Capture: 0.5-10 µg/ml ELISA Detection: 0.05-0.2 µg/ml

Western Blot: 1-2 µg/ml

Flowcytometry analysis: 1-2 µg/10^6Cells
