

## 30-1284: Anti-CD10 / CALLA Monoclonal Antibody (Clone:LT10)

Clonality :	Monoclonal
Clone Name :	LT10
Application :	FACS
Reactivity :	Human
Gene :	MME
Gene ID :	4311
Uniprot ID :	P08473
Format :	Purified
Alternative Name :	MME,EPN
Isotype :	Mouse IgG1
Immunogen Information : mouse NALM-6 leukemia pre-B cell line (tissue/cell preparation)	

## Description

CD10 (neutral endopeptidase - NEP, common acute lymphocytic leukemia antigen - CALLA, membrane metalloendopeptidase - MME, enkefalinase) is a 100-kDa cell surface zinc metalloprotease cleaving peptide bonds on the N-terminus of hydrophobic amino acids and inactivating multiple physiologically active peptids. CD10 is expressed on various normal cell types, including lymphoid precursor cells, germinal center B lymhocytes, and some epithelial cells, and its expression level serves as a marker for diagnostics of many carcinomas. CD10 is also a differentiation antigen for early B-lymphoid progenitors in the B-cell differentiation pathway and has a key role in regulation of growth, differentiation and signal transduction of many cellular systems.

## **Product Info**

Amount :	0.1 mg
Purification :	Purified by precipitation and chromatography
Storage condition :	Store at 2-8°C. Do not freeze.
