30-1941: Anti-CD11b / Mac-1 alpha Monoclonal Antibody (Clone:MEM-174)-FITC Conjugated

Clonality: Monoclonal Clone Name: MEM-174 Application: FACS. IP Reactivity: Human Conjugate: FITC **ITGAM** Gene: Gene ID: 3684 **Uniprot ID:** P11215

Alternative Name: ITGAM,CD11B,CR3A

Isotype: Mouse IgG2a

Immunogen Information: Human granulocytes

Description

CD11b (integrin alphaM subunit) is a 165-170 kDa type I transmembrane glycoprotein that non-covalently associates with integrin beta2 subunit (CD18); expression of the CD11b chain on the cell surface requires the presence of the CD18 antigen. CD11b/CD18 integrin (Mac-1, CR3) is highly expressed on NK cells, neutrophils, monocytes and less on macrophages. CD11b/CD18 integrin is implicated in various adhesive interactions of monocytes, macrophages and granulocytes, facilitating their diapedesis, as well as it mediates the uptake of complement coated particles, serving as a receptor for the iC3b fragment of the third complement component.

Product Info

Amount: 100 tests

Storage condition : Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
