30-1591: Anti-CD11b activation epitope Monoclonal Antibody (Clone:CBRM1/5)-Low Endotoxin

Clonality: Monoclonal Clone Name: CBRM1/5

Application: FACS, IP, Functional Assay

Reactivity: Human

Format: Low Endotoxin Isotype: Mouse IgG1

Immunogen Information: Information not available

Description

CD11b (integrin alphaM subunit) is a 165-170 kDa type I transmembrane glycoprotein that non-covalently associates with integrin beta2 subunit (CD18); expression of the CD11b chain on the cell surface requires the presence of the CD18 antigen. CD11b/CD18 integrin (Mac-1, CR3) is highly expressed on NK cells, neutrophils, monocytes and less on macrophages. CD11b/CD18 integrin is implicated in various adhesive interactions of monocytes, macrophages and granulocytes, facilitating their diapedesis, as well as it mediates the uptake of complement coated particles, serving as a receptor for the iC3b fragment of the third complement component.

Product Info

Amount: 0.1 mg

Purification: Purified by protein-A affinity chromatography

Storage condition : Store at 2-8°C. Do not freeze.

Application Note

Flow Cytometry Immunoprecipitation Functional Application blocking
