## 30-1526: Anti-CD161 Monoclonal Antibody (Clone:HP-3G10)

Clone Name: Monoclonal
HP-3G10
Application: FACS, WB

Reactivity: Human, Non-Human Primates

Gene : KLRB1
Gene ID : 3820
Uniprot ID : Q12918
Format : Purified

Alternative Name: KLRB1,CLEC5B,NKRP1A

**Isotype:** Mouse IgG1 **Immunogen Information:** human NK cells

## **Description**

CD161, also known as Nkrp1 (natural killer receptor protein 1) or Klrb1 (killer cell lectin-like receptor subfamily b member 1), is a disulphide-linked homodimeric receptor, which is involved in regulation of NK cell and NKT cell function. It is expressed on a majority of NK cells, NKT cells, and e.g. Th17 cells and CD3+ thymocytes. Although rat CD161 has three isoforms (a, b, c), the human CD161 is expressed as one isoform.

## **Product Info**

Amount: 0.1 mg

**Purification:** Purified by protein-A affinity chromatography

**Storage condition :** Store at 2-8°C. Do not freeze.
