## 30-2166: Anti-CD18 / Integrin beta2 subunit Monoclonal Antibody (Clone:MEM-48)-PE Conjugated

Clonality: Monoclonal Clone Name: MEM-48

**Application :** FACS, IP, WB, IHC, IHC-Fr, Functional Assay

Reactivity: Human
Conjugate: PE
Gene: ITGB2
Gene ID: 3689
Uniprot ID: P05107

Alternative Name: ITGB2,CD18,MFI7
Isotype: Mouse IgG1

Immunogen Information: Leukocytes of a patient suffering from a LGL-type leukemia.

## **Description**

CD18, integrin beta2 subunit, forms heterodimers with four types of CD11 molecule to constitute leukocyte (beta2) integrins: alphaLbeta2 (CD11a/CD18, LFA-1), alphaMbeta2 (CD11b/CD18, Mac-1, CR3), alphaXbeta2 (CD11c/CD18) and alphaDbeta2 (CD11d/CD18). In most cases, the response mediated by the integrin is a composite of the functions of its individual subunits. These integrins are essential for proper leukocyte migration, mediating intercellular contacts. Absence of CD18 leads to leukocyte adhesion deficiency-1; severe reduction of CD18 expression leads to the development of a psoriasiform skin disease. CD18 is also a target of Mannheimia (Pasteurella) haemolytica leukotoxin and is sufficient to mediate leukotoxin-mediated cytolysis.

## **Product Info**

Amount: 100 tests

**Storage condition:** Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

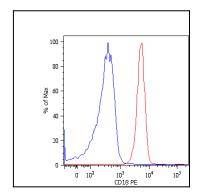

Figure 1: Surface staining of human peripheral blood cells with anti-human CD18 (MEM-48) PE. Cells in the granulocyte gate were used for analysis.
