

**30-1491: Anti-CD23 Monoclonal Antibody (Clone:EBVCS-5)(Discontinued)**

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	EBVCS-5
<b>Application :</b>	FACS, IP
<b>Reactivity :</b>	Human
<b>Gene :</b>	FCER2
<b>Gene ID :</b>	2208
<b>Uniprot ID :</b>	P06734
<b>Format :</b>	Purified
<b>Alternative Name :</b>	FCER2, CD23A, CLEC4J, FCE2, IGEBF
<b>Isotype :</b>	Mouse IgG1
<b>Immunogen Information :</b>	EBV-transformed human cells

**Description**

CD23 (Fc epsilon RII), the low affinity IgE receptor, is a 45 kDa type II membrane glycoprotein expressed more or less on eosinophils, follicular dendritic cells, Langerhans cells, mature B cells (mainly upon activation), EBV-transformed lymphoblasts, monocytes, and subpopulation of platelets. A soluble form of 37 kDa and other its fragments were also described. CD23 mediates IgE-dependent cytotoxicity by eosinophils and macrophages, and downregulates IgE secretion in response to high levels of IgE, involving release of pro-inflammatory cytokines.

**Product Info**

<b>Amount :</b>	0.1 mg
<b>Purification :</b>	Purified by protein-A affinity chromatography
<b>Storage condition :</b>	Store at 2-8°C. Do not freeze.
