30-2317: Anti-CD34 Monoclonal Antibody (Clone:581)-PE Conjugated

Clonality: Monoclonal

Clone Name: 581
Application: FACS

Reactivity: Human, Non-Human Primates

Conjugate: PE
Gene: CD34
Gene ID: 947
Uniprot ID: P28906
Alternative Name: CD34
Isotype: Mouse IgG1

Description

CD34 is a highly glycosylated monomeric 111-115 kDa surface protein, which is present on many stem cell populations. It is a well established stem cell marker, though its expression on human hematopoietic stem cells is reversible. CD34 probably serves as a surface receptor that undergoes receptor-mediated endocytosis and regulates adhesion, differentiation and proliferation of hematopoietic stem cells and other progenitors. CD34 expression is likely to represent a specific state of hematopoietic development that may have altered adhering properties with expanding and differentiating capabilities in both in vitro and in vivo conditions.

Product Info

Amount: 100 tests

Purification : Purified antibody is conjugated with R-phycoerythrin (PE) under optimum conditions.

Unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

Content: Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide **Storage condition:** Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

Application Note

Flow cytometry: The reagent is designed for analysis of human blood cells using 20 μ l reagent / 100 μ l of whole blood or 106 cells in a suspension. The content of a vial (2 ml) is sufficient for 100 tests.
