30-1529: Anti-CD42a Monoclonal Antibody (Clone:GR-P)

Clonality: Monoclonal
Clone Name: GR-P
Application: FACS

Reactivity: Human, Dog

 Gene :
 GP9

 Gene ID :
 2815

 Uniprot ID :
 P14770

 Format :
 Purified

 Alternative Name :
 GP9

 Isotype :
 Mouse IgG1

Immunogen Information: Human acute lymphoblastic leukemia cells

Description

CD42a, also known as Glycoprotein 9 (GPIX), composes together with GPIb alpha, GPIb beta and GPV the GPIb-IX-V receptor complex critical in the process of platelet-rich thrombus formation by tethering the platelet to a thrombogenic surface. CD42b binds to von Willebrand factor (VWF) exposed at a site of vascular injury, as well as to thrombin, coagulation factors XI and XII, high molecular wight kininogen, TSP-1, integrin Mac-1 and P-selectin. Defects in the gene encoding CD42a are a cause of Bernard-Soulier syndrome, also known as giant platelet disease. These patients have unusually large platelets and have a clinical bleeding tendency.

Product Info

Amount: 0.1 mg

Purification : Purified by protein-A affinity chromatography

Storage condition : Store at 2-8°C. Do not freeze.
