

30-1904: Biotin Conjugated, Anti-CD64 / FcgammaRI Monoclonal Antibody (Clone:10.1)

| Clonality : | Monoclonal |
|--|-------------------------|
| Clone Name : | 10.1 |
| Application : | FACS |
| Reactivity : | Human |
| Conjugate : | Biotin |
| Gene : | FCGR1A |
| Gene ID : | 2209 |
| Uniprot ID : | P12314 |
| Alternative Name : | FCGR1A,FCG1,FCGR1,IGFR1 |
| Isotype : | Mouse IgG1 |
| Immunogen Information : Rheumatoid synovial fluid cells and fibronectin purified human monocytes | |

Description

CD64 (FcgammaRI) is a cell surface receptor for Fc region of IgG. It is composed of specific ligand binding alpha subunit and promiscuous gamma subunit, which is indispensable for tyrosine-based signaling. However, even the alpha subunit can transduce signals leading to cellular effector functions. The isoform FcgammaRIa1 binds human IgG with high affinity, has limited myeloid cell distribution, and a relatively large intracellular domain. Products of related genes include FcgammaRIb and FcgammaRIc isoforms, but these specify low affinity IgG receptors if functionally expressed at all. Besides a role in antigen clearance, FcgammaRI (a1) can potently enhance MHC class I and II antigen presentation in vitro and in vivo.

Product Info

Amount :0.1 mgStorage condition :Store at 2-8°C. Do not freeze.
