

30-1227: Anti-CD8 Monoclonal Antibody (Clone:MEM-87)

Clonality :	Monoclonal
Clone Name :	MEM-87
Application :	IP, FACS
Reactivity :	Human
Gene :	CD8A
Gene ID :	925
Uniprot ID :	P01732
Format :	Purified
Alternative Name :	T-lymphocyte differentiation antigen T8/Leu-2, CD8a, MAL
Isotype :	Mouse IgG1
Immunogen Information :	Leukocytes of a patient suffering from LGL Type Leukemia.

Description

The CD8 T cell coreceptor (monomer approx. 32-34 kDa) is expressed as alpha/beta heterodimer on majority of MHC I-restricted conventional T cells and thymocytes and as alpha/alpha homodimer on subsets of memory T cells, intraepithelial lymphocytes, NK cells and dendritic cells. Regulation of CD8 beta level on T cell surface seems to be an important mechanism to control their effector function. Assembly of CD8 alpha-beta but not alpha-alpha dimers is connected with formation or localization to the lipid rafts. Recruiting triggered TCR complexes to these membrane microdomains as well as affinity of TCR to MHC I is modulated by CD8, thereby affecting the functional diversity of the TCR signaling.

Product Info

Amount :	0.1 mg
Purification :	Purified by protein-A affinity chromatography
Storage condition :	Store at 2-8°C. Do not freeze.

Application Note

Immunoprecipitation *Application note:* Excellent for immunoisolation of CD8 positive T cells.

Flow Cytometry *Recommended dilution:* 2 Åµg/ml
