## 30-2236: Anti-CD90.2 / Thy-1.2 Monoclonal Antibody (Clone:1aG4/C5)-PE Conjugated

Clonality: Monoclonal Clone Name: 1aG4/C5

Application: FACS, WB, ICC, Functional Assay

 Reactivity :
 Mouse

 Conjugate :
 PE

 Gene :
 Thy1

 Gene ID :
 21838

 Uniprot ID :
 P01831

Alternative Name: Thy-1 antigen, Thy1, Thy-1

**Isotype:** Mouse IgG3

Immunogen Information: thymocytes from C3H/Di mice (Thy-1.2 positive)

## **Description**

CD90 (Thy-1) is an 18-35 kDa GPI-anchored plasma membrane glycoprotein expressed in many cell types, such as in hematopoietic cells and neurons, connective tissues, various fibroblast and stromal cell lines, tumor endothelial cell lines and other. In the mouse, CD90 is expressed mainly on thymocytes and peripheral T lymphocytes. It is involved in T cell activation, cellular adhesion, proliferation and migration, neurite outgrowth, wound healing, apoptosis, and fibrosis. CD90 participates in multiple signaling cascades and its effects are tissue- and cell type-specific. It often functions as an important regulator of cell-cell and cell-matrix interactions.

## **Product Info**

Amount: 0.1 mg

**Storage condition :** Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
