## 30-1889: Anti-CRP Monoclonal Antibody (Clone:C7)-Biotin Conjugated

Clonality: Monoclonal

**Clone Name: C7 Application: ELISA** Reactivity: Human Conjugate: **Biotin** Gene: **CRP** Gene ID: 1401 **Uniprot ID:** P02741 **Alternative Name:** CRP,PTX1 Isotype: Mouse IgG1

Immunogen Information: Purified human CRP

## **Description**

The C-reactive protein (CRP) is a cyclic pentameric pentraxin family acute phase protein compound of five identical noncovalently bound nonglycosylated subunits (each subunit 24 kDa; physiologic CRP molecule 117,5 kDa). CRP is produced by the liver and its plasma levels rise dramatically during inflammatory processes occuring in the body. CRP is an initiator of classical complement cascade, binds to several nuclear components (chromatin, histones, etc.) and is also believed to play an important role in innate immunity. Patients with elevated basal levels of CRP are at increased risk for hypertension and cardiovascular disease.

## **Product Info**

Amount: 0.1 mg

**Storage condition :** Store at 2-8°C. Do not freeze.
