## 30-2120: PE Conjugated Anti-IgD Monoclonal Antibody (Clone:IA6-2)

Clonality: Monoclonal

Clone Name: IA6-2 FACS Application: Reactivity: Human PΕ Conjugate: **IGHD** Gene: Gene ID: 3495 **Uniprot ID:** P01880 **Alternative Name: IGHD** 

**Isotype:** Mouse IgG2a **Immunogen Information:** Human IgD

## **Description**

Immunoglobulin D (IgD) is expressed on the surface of naive mature B cells, thus later than IgM, and is coexpressed with it then. Triggered by antigen binding, it signals through the CD79 complex to activate the B cells. Expression of IgD is lost after the isotype switch. Soluble IgD is present in very small amounts in the serum. IgD can bind to basophils and mast cells to activate them in an IgE-independent way to participate in respiratory immune defense.

## **Product Info**

Amount: 100 tests

**Storage condition :** Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.
