30-2054: FITC Conjugated Anti-MHC Class II Monoclonal Antibody (Clone:M5/114)

Clonality: Monoclonal **Clone Name:** M5/114 Application: **FACS** Reactivity: Mouse Conjugate: FITC Gene: Ciita Gene ID: 12265 **Uniprot ID:** P79621

Alternative Name : Ciita,C2ta,Mhc2ta

Isotype: Rat IgG2b

Immunogen Information: Activated C57BL/6 mouse spleen cells

Description

MHC (major histocompatibility complex) class II molecules are transmembrane glycoproteins expressed on the surface of professional antigen-presenting cells, such as macrophages, dendritic cells and B cells. Before their exposition on the cell surface, the MHC class II molecules react with endocytosed exogenous antigens, which are then presented to the T cells. The antigen-binding grove between MHC class II alpha and beta chain is open at both ends and is 15-24 amino acid residues long.

Product Info

Amount: 0.1 mg

Storage condition : Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

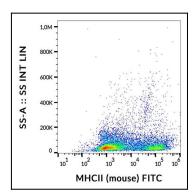

Figure 1: Flow cytometry analysis (surface staining) of MHCII on murine splenocytes with anti-MHCII (M5/114) FITC.
