

## 42-1342: Anti-HSP40, YDJ1 Monoclonal Antibody (Clone : 1G10.H8) -Streptavidin(Discontinued)

| Clonality :             | Monoclonal                             |
|-------------------------|--|
| Clone Name :            | 1G10.H8                                |
| Application :           | WB,IP,ELISA                            |
| Reactivity :            | Yeast                                  |
| Conjugate :             | Streptavidin                           |
| Gene :                  | YDJ1                                   |
| Gene ID :               | 855661                                 |
| Uniprot ID :            | P25491                                 |
| Alternative Name :      | YDJ1,MAS5,YNL064C,N2418,YNL2418C       |
| Isotype :               | Mouse IgG1 Kappa                       |
| Immunogen Information : | Full length protein yeast HSP40 (YDJ1) |

## Description

Human HSP40/DnaJ proteins comprise a large protein family, members of which feature the J domain (named after the bacterial DnaJ protein). The J-domain spans the first 75 N-terminal amino acids and is separated from the C-terminal by a glycine/phenylalanine-rich domain. There are two main types of HSP40; type 1 DNAJ proteins including HDJ2 and yeast Ydjl; type II includes yeast Sis1 and human Hdj1. Whereas type I possesses a zinc finger domain which helps in the function of protein folding, type II does not. Members of the HSP40/DnaJ family play diverse roles in many cellular processes, such as folding, translocation, degradation and assembly of multi-protein complexes. HSP40 stimulates the ATPase activity of HSP70 which in turn causes conformational changes of the unfolded proteins. The HSP40-HSP70-unfolded protein complex further binds to co-chaperones Hip, Hop and HSP90 which leads to protein folding, or components of protein degradation machinery CHIP and BAG-1.

## **Product Info**

| Amount :            | 100 μg                           |
|---------------------|----------------------------------|
| Purification :      | Protein G Purified               |
| Content :           | 50% glycerol, 0.09% sodium azide |
| Storage condition : | Store the antibody at 4°C        |

## **Application Note**

WB (1:2000); optimal dilutions for assays should be determined by the user.
