

32-20069: Animal-Free Recombinant Human EGF(Discontinued)

Reactivity : chicken, cow, Hamster, horse, Human , Human + Hamster, monkey, mouse, pig, rabbit, rat

Alternative Name : Epidermal Growth Factor, Urogastrone, URG

Description

Source: **E.coli** EGF is a potent growth factor that stimulates the proliferation of various epidermal and epithelial cells. Additionally, EGF has been shown to inhibit gastric secretion, and to be involved in wound healing. EGF signals through a receptor known as c-erbB, which is a class I tyrosine kinase receptor. This receptor also binds with TGF-Alpha and VGF (vaccinia virus growth factor). Recombinant Human EGF is a 6.2 kDa globular protein containing 53 amino acid residues, including 3 intramolecular disulfide bonds. *Animal-Free Recombinant Human EGF has replaced Recombinant Human EGF.

Product Info

Amount : 100 µg / 500 µg

Purification : Purity: $\geq 98\%$ by SDS-PAGE gel and HPLC analyses.

Content : This recombinant protein is supplied in lyophilized form.

Amino Acid : NSDSECPLSH DGYCLHDGVC MYIEALDKYA CNCVVG YIGE RCQYRDLKWW ELR

Application Note

The ED_{50} was determined by a cell proliferation assay using balb/c 3T3 cells is ≤ 0.1 ng/ml, corresponding to a specific activity of $\geq 1 \times 10^7$ units/mg
