32-20071: Animal-Free Recombinant Murine EGF(Discontinued)

Reactivity: Human, mouse

Alternative Name: Epidermal Growth Factor, Urogastrone, URG

Description

Source:E.coliEGF is a potent growth factor that stimulates the proliferation of various epidermal and epithelial cells. Additionally, EGF has been shown to inhibit gastric secretion, and to be involved in wound healing. EGF signals through a receptor known as c-erbB, which is a class I tyrosine kinase receptor. This receptor also binds with TGF-Alpha and VGF (vaccinia virus growth factor). Recombinant Murine EGF is a 6.0 kDa globular protein containing 53 amino acid residues, including 3 intramolecular disulfide bonds.

Product Info

Amount : $100 \mu g / 500 \mu g$

Purification : Purity: >= 98% by SDS-PAGE gel and HPLC analyses. **Content :** This recombinant protein is supplied in lyophilized form.

Amino Acid: NSYPGCPSSY DGYCLNGGVC MHIESLDSYT CNCVIGYSGD RCQTRDLRWW ELR

Application Note

TheÃ \square ED $_{50}$ Ã \square was determined by a cell proliferation assay using BALB/c 3T3 cells is <= 0.1 ng/ml, corresponding to a specific activity of >= 1 x 10^7 Ã \square units/mg.
