

32-20128: Recombinant Murine gAcrp30(Discontinued)

Reactivity : Mouse

Alternative Name : APM-1, gad, globular domain of Acrp30

Description

Source: **E.coli** gAcrp30 is a naturally occurring globular protein obtained by proteolytic processing of adiponectin. Adiponectin is produced and secreted exclusively by adipocytes, and is a relatively abundant plasma protein, accounting for up to 0.05% of total serum protein. Like Adiponectin, gAcrp30 is capable of decreasing hyperglycemia and reversing insulin resistance. Additionally, gAcrp30 has been shown to be an important factor in promoting fat loss by signaling muscle to absorb and burn Free-Fatty Acids (FFAs). The signaling receptors for adiponectin and gAcrp30 have recently been identified and named AdipoR1 and AdipoR2. AdipoR2 is predominantly expressed in the liver. Recombinant Murine gAcrp30 is a 16.6 kDa protein consisting of 145 amino acid residues.

Product Info

Amount : 5 µg / 25 µg

Purification : Purity: >= 98% by SDS-PAGE gel and HPLC analyses.

Content : This recombinant protein is supplied in lyophilized form.

Amino Acid : MKGEPGEAAY MYRSAFSVGL ETRVTVPNVP IRFTKIFYNQ QNHYDGSTGK FYCNIPGLYY FSYHITVYMK
DVKVSLFKKD KAVLFTYDQY QEKNVDQASG SVLLHLEVG D QVWLQVYGDG DHNGLYADNV
NDSTFTGFL YHDTN

Application Note

Determined by its ability to inhibit the proliferation of murine myeloid cell lines M1. The ED_{50} for this effect is ≤ 15 µg/ml.
