

32-20199: Recombinant Murine IL-1Alpha (Discontinued)

Reactivity : Human, Mouse
Alternative Name : Hematopoietin-1, Lymphocyte-activating factor (LAF), Endogenous Pyrogen (EP), Leukocyte Endogenous Mediator (LEM), Mononuclear Cell Factor (MCF)

Description

Source: E.coli IL-1Alpha is a non-secreted, proinflammatory cytokine produced in a variety of cells, including monocytes, tissue macrophages, keratinocytes and other epithelial cells. Both IL-1Alpha and IL-1Beta bind to the same receptor and have similar, if not identical, biological properties. These cytokines have a broad range of activities including the stimulation of thymocyte proliferation by inducing IL-2 release, B cell maturation and proliferation, mitogenic FGF-like activity, and the release of prostaglandin and collagenase from synovial cells. However, whereas IL-1Beta is a secreted cytokine, IL-1Alpha is predominantly a cell-associated cytokine. Recombinant Murine IL-1Alpha is a 17.9 kDa protein containing 156 amino acid residues.

Product Info

Amount : 2 µg / 10 µg
Purification : Purity: >= 98% by SDS-PAGE gel and HPLC analyses.
Content : This recombinant protein is supplied in lyophilized form.
Amino Acid : SAPYTYQSDL RYKLMKLVQR KFMNDSLNR TIYQDVVKHY LSTTWLNDLQ QEVKFDMYAY
SSGGDDSKYP VTLKISDSQL FVSAQGEDQP VLLKELPETP KLITGSETDL IFFWKSINSK NYFTSAAYPE
LFIATKEQSR VHLARGLPSP TDFQIS

Application Note

The ED₅₀ as determined by the dose-dependent stimulation of murine D10S cells is <= 0.002 ng/ml, corresponding to a specific activity of >= 5 x 10⁸ units/mg.
