

## 32-20208: Recombinant Human IL-2(Discontinued)

**Reactivity :** Chicken, Cow, Dog, Human, Monkey, Mouse, Rat

**Alternative Name :** T-cell growth factor (TCGF), Aldesleukin

### Description

**Source:** E.coli IL-2 is a powerful immunoregulatory lymphokine produced by T cells in response to antigenic or mitogenic stimulation. IL-2/IL-2R signaling is required for T cell proliferation and other fundamental functions that are essential for the immune response. IL-2 stimulates growth and differentiation of B cells, NK cells, lymphokine-activated killer cells, monocytes, macrophages and oligodendrocytes. Recombinant Human IL-2 is a 15.5 kDa protein, containing 134 amino acid residues including one intrachain disulfide bond.
