32-20256: Animal-Free Recombinant Human I-TAC (CXCL11)(Discontinued)

Alternative Name: Interferon Inducible T-Cell Alpha Chemokine, B-R1

Description

Source: E.coli

I-TAC is a 'non-ELR' CXC chemokine that is regulated by interferon and signals through the CXCR3 receptor. I-TAC is chemoattractant for IL-2 activated T cells, but does not affect freshly isolated un-stimulated T cells, neutrophils, ormonocytes. Recombinant Human I-TAC (CXCL11) is an 8.3 kDa protein containing 73 amino acid residues, including the four highly conserved cysteine residues present in CXC chemokines.Â

Product Info

Amount: $5 \mu g / 20 \mu g$

Purification : Purity: >= 98% by SDS-PAGE gel and HPLC analyses. **Content :** This recombinant protein is supplied in lyophilized form.

Amino Acid: FPMFKRGRCL CIGPGVKAVK VADIEKASIM YPSNNCDKIE VIITLKENKG QRCLNPKSKQ ARLIIKKVER KNF

Application Note

Determined by its ability to chemoattract human T-cells activated with IL-2.
