

32-20361: Animal-Free Recombinant Human TGF-Alpha(Discontinued)**Alternative Name** : Transforming Growth Factor-Alpha , Sarcoma growth factor, TGF-type I, ETGF**Description****Source:**E.coli

TGF-Alpha is an EGF-related polypeptide growth factor that signals through the EGF receptor, and stimulates the proliferation of a wide range of epidermal and epithelial cells. It is produced by monocytes, keratinocytes, and various tumor cells. TGF-Alpha induces anchorage-independent transformation in cultured cells. Human, murine and rat TGF-Alpha are cross-species reactive. Recombinant Human TGF-Alpha is a 50 amino acid polypeptide (5.5 kDa), which shares approximately 40% sequence homology with EGF, including 6 conserved cysteine residues, which form 3 intramolecular disulfide bonds.

Product Info**Amount** : 20 µg / 100 µg**Purification** : Purity:>= 98% by SDS-PAGE gel and HPLC analyses.**Content** : This recombinant protein is supplied in lyophilized form.**Amino Acid** : VVSHFNDCPD SHTQFCFHGT CRFLVQEDKP ACVCHSGYVG ARCEHADLLA**Application Note**

Determined by its ability to stimulate the proliferation of mouse Balb/c 3T3 cells. The expected ED₅₀ is <=0.2 ng/ml, corresponding to a specific activity of>= 5 x 10⁶

units/mg.
