32-20403: Animal-Free Recombinant Human Beta -NGF(Discontinued)

Reactivity: Chicken, Human, Mouse, Rat

Alternative Name: NGF-Beta, beta-Nerve Growth Factor

Description

Source:E.coliBeta -NGF is a neurotrophic factor structurally related to BDNF, NT-3 and NT-4. These proteins belong to the cysteine-knot family of growth factors that assume stable dimeric structures. Beta -NGF is a potent neurotrophic factor that signals through its receptor Beta -NGFR, and plays a crucial role in the development and preservation of the sensory and sympathetic nervous systems. Beta -NGF also acts as a growth and differentiation factor for B lymphocytes, and enhances B-cell survival. The functional form of Recombinant Human Beta -NGF is a non-covalently-linked homodimer of two 13.5 kDa, polypeptide monomers that each contain 120 amino acids and three disulfide bonds, which are required for biological activity.

Product Info

Amount: 20 μg / 100 μg

Purification: Purity:>= 98% by SDS-PAGE gel and HPLC analyses. **Content:** This recombinant protein is supplied in lyophilized form.

Amino Acid: SSSHPIFHRG EFSVCDSVSV WVGDKTTATD IKGKEVMVLG EVNINNSVFK QYFFETKCRD PNPVDSGCRG

IDSKHWNSYC TTTHTFVKAL TMDGKQAAWR FIRIDTACVC VLSRKAVR

Application Note

Determined by the dose-dependent stimulation of the proliferation of human TF-1 cells. The expected $\tilde{A} \square \hat{A} = 1.0$ ng/ml, corresponding to a specific activity of>= 1 x $10^6 \tilde{A} \square \hat{A}$ units/mg.
