

32-20469: Recombinant Human RANTES (CCL5)(Discontinued)

Reactivity : Cow, Hamster, Human, Monkey, Mouse, Rat

Alternative Name : Regulation upon Activation Normal T cell Express Sequence, CCL5, SIS-delta

Description

Source: **E.coli** RANTES is a CC chemokine that can signal through the CCR1, CCR3, CCR5 and US28 (cytomegalovirus receptor) receptors. It is a chemoattractant towards monocytes, memory T cells (CD4+/CD45RO), basophils, and eosinophils. RANTES also has the capability to inhibit certain strains of HIV-1, HIV-2 and simian immunodeficiency virus (SIV). Recombinant Human RANTES is a 7.8 kDa protein containing 68 amino acid residues, including the four highly conserved cysteine residues present in the CC chemokines.

Product Info

Amount : 5 µg / 20 µg

Purification : Purity: >= 98% by SDS-PAGE gel and HPLC analyses.

Content : This recombinant protein is supplied in lyophilized form.

Amino Acid : SPYSSDTTPC CFAYIARPLP RAHIKEYFYT SGKCSNPAVV FVTRKNRQVC ANPEKKWVRE YINSLEMS

Application Note

Determined by its ability to chemoattract human blood monocytes using a concentration range of 1.0-10.0 ng/ml.
