

## 44-1162: Anti-Kappa Monoclonal Antibody (Clone:IHC610)-Ready to Use

<b>Clonality :</b>	Monoclonal
<b>Clone Name :</b>	IHC610
<b>Application :</b>	IHC
<b>Reactivity :</b>	Human
<b>Gene :</b>	IGKV1D-16
<b>Uniprot ID :</b>	P01601
<b>Alternative Name :</b>	Immunoglobulin kappa variable 1D-16, Ig kappa chain V-I region HK146, Ig kappa chain V-I region HK189

### Description

Anti-Kappa recognizes surface immunoglobulin on normal and neoplastic B-cells, and has been indicated as a potential aid in the identification of leukemias, plasmacytomas, and certain non-Hodgkin's lymphomas, where the expression of a single light chain class is restricted. The determination of light chain ratio is critical in evaluating B-cell neoplasms, as the majority of B-cell lymphomas express either kappa or lambda light chains, while a mixture of kappa and lambda is characteristic of reactive proliferations. In paraffin-embedded tissue, Anti-Kappa displays strong staining of kappa-positive plasma cells, as well as cells that have absorbed exogenous immunoglobulins.

### Product Info

<b>Amount :</b>	7 ml
<b>Purification :</b>	Protein A/G Chromatography
<b>Storage condition :</b>	Store at 2°C - 8°C.

### Application Note

This product is available in ready to use format, hence no dilution is required.
