Monoclonal Clonality:

B6.2 + PRLR742 Clone Name:

Application: IHC Reactivity: Human Gene: **PRLR** Gene ID: 5618 **Uniprot ID:** P16471 Format: Purified **Alternative Name: PRLR** 

Isotype: Mouse IgG1, kappa + Mouse IgG1, kappa

Immunogen Information: Semi-purified human prolactin receptor (B6.2); Recombinant human prolactin receptor (PRLR742)

## **Description**

It recognizes a protein of 70kDa, identified as prolactin receptor. Prolactin is a pituitary hormone involved in the stimulation of milk production, salt and water regulation, growth, development and reproduction. The initial step in its action is the binding to a specific membrane receptor (prolactin receptor), which belongs to the superfamily of class 1 cytokine receptors. The function of the prolactin receptor is mediated, at least in part, by two families of signaling molecules: Janus kinases and signal transducers and activators of transcription.
