

37-1276: Human Galectin-9 / LGALS9 Recombinant Protein (Fc Tag)(Discontinued)

Reactivity : Human

Alternative Name : HUAT Protein, LGALS9A Protein,

Description

Source : HEK293 Cells

The galectins are a family of beta-galactoside-binding proteins implicated in modulating cell-cell and cell-matrix interactions. The protein encoded by this gene is an S-type lectin. It is overexpressed in Hodgkin's disease tissue and might participate in the interaction between the H&RS cells with their surrounding cells and might thus play a role in the pathogenesis of this disease and/or its associated immunodeficiency. Multiple alternatively spliced transcript variants have been found for this gene. Product Info

Amount : 9 / LGALS9 Recombinant Protein (Fc Tag)(Discontinued) / 200 µg

Purification : > 90% as determined by SDS-PAGE.

Formulation Lyophilized from sterile PBS, pH 7.4.

Content : Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.

Storage condition : Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Amino Acid : Ala2-Thr323

Application Note

Endotoxin :< 1.0 EU per µg protein as determined by the LAL method.
