

# **37-1306: Human MMP-26 / Matrix metalloRecombinant Proteinase-26 Recombinant Protein(Discontinued)**

Reactivity : Human Alternative Name : MMP26 Protein,

## **Description**

#### Source : E. coli

Matrix metalloproteinase-26 (MMP26) is a member of matrix metalloproteinases (MMPs) and has been reported to be highly expressed in many cancers. MMP26 is a target gene of miR-125b. And the expression profile of MMP26 showed an inverse relationship with miR-125b in vivo and in vitro. The overexpression of MMP26 in SW1353 cells increased cell invasiveness, while inhibition of MMP26 decreased cell invasiveness.

## **Product Info**

Amount :	26 Recombinant Protein(Discontinued) / 100 μg
Purification :	> 90 % as determined by SDS-PAGE
Content :	Formulation Lyophilized from sterile PBS, pH 7.4 Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before lyophilization.
Storage condition :	Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.
Amino Acid :	Thr90-Pro261

### **Application Note**

Measured by its ability to cleave the fluorogenic peptide substrate, Mca-Pro-Leu-Gly-Leu-Dpa-Ala-Arg-NH2. The specific activity is > 60 pmol/min/ $\tilde{A}$ [ $\hat{A}\mu$ g. Other pack size also available.
