## 37-1309: Human GITR / TNFRSF18 Recombinant Protein (Fc Tag)(Discontinued)

**Reactivity:** Human

Alternative Name: AITR Protein, CD357 Protein, GITR Protein, GITR-D Protein,

## **Description**

#### Source: HEK293 Cells

GITR, also known as TNFRSF18(CD357), belongs to the tumor necrosis factor receptor (TNF-R) superfamily. It is the receptor for TNFSF18. GITR plays a key role in dominant immunological self-tolerance maintained by CD25(+)CD4(+) regulatory T cells. GITR may be involved in interactions between activated T-lymphocytes and endothelial cells and in the regulation of T-cell receptor-mediated cell death. GITR and its ligand are important costimulatory molecules in the pathogenesis of autoimmune diseases. It also mediates NF-kappa-B activation via the TRAF2/NIK pathway. ### **Product Info**

Amount: Human GITR / TNFRSF18 Recombinant Protein (Fc Tag)(Discontinued) / 100 µg

**Purification:** > 90 % as determined by SDS-PAGE

Formulation Lyophilized from sterile PBS, pH 7.4

**Content:** Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants before

lyophilization.

Storage condition:

Storage condition:

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be

aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Amino Acid: Met1-Glu161

# **Application Note**

Endotoxin :< 1.0 EU per Ã\(\hat{A}\)µg of the protein as determined by the LAL method
