36-2384: Anti-Growth Hormone (Pituitary Marker) Monoclonal Antibody(Clone: GH/1450)

Clonality: Monoclonal Clone Name: GH/1450 Application: IHC Reactivity: Human Gene: GH1 Gene ID: 2688 **Uniprot ID:** P01241

GH; GH-N; GH1; GHN; Growth hormone 1; Growth hormone; Growth hormone, pituitary; HG1; **Alternative Name:**

hGH-N; IGHD1B; Pituitary growth hormone; RNGHGP; Somatotropin

Isotype:

A recombinant fragment (around aa58-187) of human Growth Hormone (GH) protein (exact Immunogen Information:

sequence is proprietary)

Description

Pituitary growth hormone (GH) plays a crucial role in stimulating and controlling the growth, metabolism and differentiation of many mammalian cell types by modulating the synthesis of multiple mRNA species. These effects are mediated by the binding of GH to its membrane-bound receptor, GHR, and involve a phosphorylation cascade that results in the modulation of numerous signaling pathways. GH is synthesized by acidophilic or somatotropic cells of the anterior pituitary gland. Anti-GH is a useful marker in classification of pituitary tumors and the study of pituitary disease (acromegaly).

Product Info

Amount: 20 μg / 100 μg

200 μg/ml of Ab Purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS Content:

with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.

Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody Storage condition:

is stable for 24 months. Non-hazardous.

Application Note

Immunohistochemistry (Formalin-fixed) (0.1-0.2ug/ml for 30 min at RT)(Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95&deqC followed by cooling at RT for 20 minutes);
