

36-2464: Anti-HGF / SF Monoclonal Antibody(Clone: EGH2 4C12.1)

Clonality :	Monoclonal
Clone Name :	EGH2 4C12.1
Application :	ELISA
Reactivity :	Human
Gene :	HGF
Gene ID :	3082
Uniprot ID :	P14210
Alternative Name :	F-TCF; Fibroblast derived tumor cytotoxic factor; Hepatocyte growth factor (hepatopoietin A; scatter factor); Hepatocyte growth factor beta chain; Hepatopoietin-A; HGF; HGFB; HPTA; Lung fibroblast derived mitogen; Scatter Factor
Isotype :	Mouse IgG2b, kappa
Immunogen Information :	Recombinant full-length human HGF/SF protein.

Description

This gene encodes a protein that binds to the hepatocyte growth factor receptor to regulate cell growth, cell motility and morphogenesis in numerous cell and tissue types. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate alpha and beta chains, which form the mature heterodimer. This protein is secreted by mesenchymal cells and acts as a multi-functional cytokine on cells of mainly epithelial origin. This protein also plays a role in angiogenesis, tumorigenesis, and tissue regeneration. Although the encoded protein is a member of the peptidase S1 family of serine proteases, it lacks peptidase activity. Mutations in this gene are associated with nonsyndromic hearing loss.

Product Info

Amount :	20 µg / 100 µg
Content :	200 µg/ml of Ab Purified from Bioreactor Concentrate by Protein A/G. Prepared in 10mM PBS with 0.05% BSA & 0.05% azide. Also available WITHOUT BSA & azide at 1.0mg/ml.
Storage condition :	Antibody with azide - store at 2 to 8°C. Antibody without azide - store at -20 to -80°C. Antibody is stable for 24 months. Non-hazardous.

Application Note

ELISA (For coating, order antibody without BSA);
