36-3519: Anti-CD8A (Cytotoxic- & Suppressor T-Cell Marker) Polyclonal Antibody

Clonality :	Polyclonal
Application :	ELISA
Reactivity :	Human
Gene :	CD8A
Gene ID :	925
Uniprot ID :	P01732
Alternative Name :	CD8 antigen, alpha polypeptide (p32), T8/Leu-2 T-lymphocyte differentiation antigen, Ly3, LYT3, MAL, T-cell surface glycoprotein CD8 alpha chain
Isotype :	Rabbit IgG
Immunogen Information :	Recombinant fragment from C-terminal cytoplasmic domain of alpha chain of human CD8 (exact sequence is proprietary).

Description

CD8 is a cell surface receptor expressed either as a heterodimer with the CD8 beta chain (CD8 alpha/beta) or as a homodimer (CD8 alpha/alpha). A majority of thymocytes and a subpopulation of mature T cells and NK cell express CD8a. CD8 binds to MHC class 1 and throÂµgh its association with protein tyrosine kinase p56lck plays a role in T cell development and activation of mature T cells. For mature T-cells, CD4 and CD8 are mutually exclusive, so anti-CD8, generally used in conjunction with anti-CD4. It is a useful marker for distinguishing helper/inducer T-lymphocytes, and most peripheral T-cell lymphomas are CD4+/CD8-. Anaplastic large cell lymphoma is usually CD4+ and CD8-, and in T-lymphoblastic lymphoma/leukemia, CD4 and CD8 are often co-expressed. CD8 is also found in littoral cell angioma of the spleen.

Product Info

Amount :	20 µg / 100 µg
Content :	200 µg/ml of antibody Purified from rabbit anti-serum by Protein A chromatography. Supplied in 10mM PBS, pH 7.4 with 0.05% BSA and 0.05% sodium azide. Contact us if you require this antibody in a different format.
Storage condition :	Antibody with azide - store at 2 to 8°C. Antibody is stable for 24 months. Non-hazardous.

Application Note

ELISA (For coating, order Ab without BSA);

For Research Use Only. Not for use in diagnostic/therapeutics procedures.
