

## 32-6257: SARS Membrane Protein

**Alternative Name :** SARS Membrane

### Description

Source : Escherichia Coli.

The E.coli derived recombinant protein contains the Membrane protein immunodominant regions fused to 6xHis tag at C-terminal.

SARS Membrane protein is a membranal protein which plays a crucial role in the virus's life cycle. This protein has 3 outer cell structural antigens, the envelope (E), membrane (M) and spike (S) antigens. SARS Membrane protein is essential to the process of assembly, budding, creation of the envelope and pathogenesis.

### Product Info

<b>Amount :</b>	50 µg / 0.25 mg
<b>Purification :</b>	Protein is >90% pure as determined SDS-PAGE.
<b>Content :</b>	SARS Membrane protein solution is supplied in PBS.
<b>Storage condition :</b>	Protein is shipped on ice packs. Upon arrival, Store at -20°C.
