## 12-4050: Phospho-Rb (Ser807/811) (Clone: D9) rabbit mAb

Clonality: Monoclonal
Clone Name: RbS807S811-D9

Application :FACS,WBReactivity :Human, MouseConjugate :UnconjugatedFormat :Purified

Alternative Name: Retinoblastoma-associated protein, p105-Rb, pRb, pp110

**Isotype:** Rabbit IgG1k

Immunogen Information: A synthetic phospho-peptide corresponding to residues surrounding Ser807/Ser811 of human

phospho Rb

## **Description**

Retinoblastoma protein (Rb, phospho Rb) is a tumor suppressor protein that is inactivated in a numbr of diverse cancers. The antiproliferative activity of Rb is mediated by its ability to inhibit the transcription of genes that are required for cell cycle progression. Rb contains conserved sites that are phosphorylated by cyclin-dependent kinases (CDKs). CDK phosphorylation typically promotes protein-protien interations through creation of a phospho-epitope that becomes structured upon binding its target. However Rb phosphorylation distrupts interactions with its binding partners. When it is phosphorylated, phospho Rb is inactivated and allows execcisve cell growth that is seen in cancer cells. Sixteen potential sites for CDK-mediated phosphorylation exist in Rb and twelve of these sites have been shown to be phosphorylated in vivo.

## **Product Info**

**Amount :** 20 μl / 200 μl

Content: 1X PBS, 0.02% NaN3, 50% Glycerol, 0.1% BSA

**Storage condition :** Store at -20°C. Avoid repeated freeze and thaw cycles.

## **Application Note**

Use 1  $\tilde{A} \cap \hat{A} = 0.5$  for flow cytometry and 0.1  $\tilde{A} \cap \hat{A} = 0.5$  for western blotting. (0.5 mg/ml, more than 200 western blots)

Fig-1: Flow cytometric analysis of U937 cells untreated and unstained as negative control (blue) or untreated and stained (green) or treated with lambda phosphatase and stained (red) using Phospho-Rb (Ser807/811) antibody RBS807S811-D9. at 1  $\mu$ g/mL.
