

## 32-9124: Recombinant Human S100 Calcium Binding Protein S100A8/S100A9 Heterodimer (C-His)

**Alternative Name :** S100A8/A9

### Description

Source : E. coli;

S100A8 and S100A9 are pro-inflammatory members of the S100 family of secreted calcium binding proteins. They are produced by neutrophils and monocytes, and forms Ca<sup>2+</sup>-dependent heterodimer/heterotetramer complexes (known as calprotectin). Calprotectin (S100A8/A9) is upregulated at sites of inflammation (e.g. psoriasis, rheumatoid arthritis, cardiac ischemia). It is involved in facilitating leukocyte arachidonic acid trafficking and metabolism, modulation of the tubulin-dependent cytoskeleton during migration of phagocytes and activation of the neutrophilic NADPH-oxidase.

### Product Info

**Amount :** 500 µg / 50 µg

**Content :** Supplied as a 0.2 µm filtered solution of 2µM HEPES, 15µM NaCl, 10% Glycerol, 2.µM EDTA, pH7.4.

**Amino Acid :** Recombinant Human S100A8/S100A9 Heterodimer is produced by E.coli. The target gene encoding M1-E93 & M1-P114 is expressed with a 6His tag at the C-terminus.
