## 32-9312: Recombinant Human BTIGSF/IGSF11(C-Fc)(Discontinued)

Alternative Name: BT-IgSF; CT119; CXADRL1; Igsf13; VSIG3

## **Description**

Source: Human Cells;

Immunoglobulin superfamily member 11(IGSF11) is abundantly expressed in testis and ovary and to a lower extent in brain, kidney and skeletal muscle.IGSF11 functions as a cell adhesion molecule through homophilic interaction and can also stimulates cell growth.IGSF proteins share significant homology with endothelial cell-selective adhesion molecule and coxsackievirus and adenovirus receptor, which mediates cell attachment and homotypic intercellular interactions.

## **Product Info**

**Amount**: 500 μg / 50 μg

Content: Lyophilized from a 0.2 µm filtered solution of PBS,pH7.4.

Amino Acid: Recombinant Human Immunoglobulin superfamily member 11 is produced by our Mammalian

expression system and the target gene encoding Leu23-Gly245 is expressed with a Fc tag at the C-

terminus.
