32-9380: Recombinant Human Fc gamma RIIIB/FCGR3B/CD16b (C-6His)

Alternative Name : Low affinity immunoglobulin gamma Fc region receptor III-B; Fc-gamma RIII-beta; FcR-10; IgG Fc receptor III-1; FCG3; FCGR3; CD16b and FCGR3B.

Description

Source: Human Cells;

Low affinity immunoglobulin gamma Fc region receptor III-B, also known as Fc-gamma RIII-beta, FcR-10, IgG Fc receptor III-1, FCG3, FCGR3, CD16b and FCGR3B. FCGR3B is a GPI-anchor membrane protein and contains two Ig-like C2 type domains. FCGR3B can be expressed in orphonuclear leukocytes and stimulated eosinophils. FCGR3B can interact with INPP5D/SHIP1. FCGR3B localizes in the FCGR gene cluster is a CN polymorphic gene involved in the recruitment of polymorphonuclear neutrophils to sites of inflammation and their activation. FCGR3B may serve as a trap for immune complexes in the peripheral circulation which does not activate neutrophils.

Product Info

Amount : 500 μg / 50 μg

Content: Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.

Amino Acid: Recombinant Human Low Affinity Immunoglobulin Gamma Fc Region Receptor III-B is produced

by our Mammalian expression system and the target gene encoding Thr20-Gln208 is expressed

with a 6His tag at the C-terminus.
