

32-9637: Recombinant Cynomolgus VSIR (C-6His)

Alternative Name : Platelet receptor Gi24;Stress-induced secreted protein-1;Sisp-1;C10orf54;SISP1

Description

Source : Human Cells;

platelet receptor Gi24 is a single-pass type I membrane protein, and located at the cell surface. The protein can be cleaved by MMP14, and stimulate MMP14-mediated MMP2 activation. It is participated in the BMP signaling pathway. It also regulates the CD4-positive, alpha-beta T cell proliferation, and T cell cytokine production negatively. However, the protein can regulate stem cell differentiation positively.

Product Info

Amount : 500 µg / 50 µg

Content : Lyophilized from a 0.2 µm filtered solution of PBS, pH7.4.

Amino Acid : Recombinant Cynomolgus V-set Immunoregulatory Receptor is produced by our Mammalian expression system and the target gene encoding Phe33-Ala194 is expressed with a 6His tag at the C-terminus.
