## 32-9674: Recombinant Mouse Cathepsin L/CTSL (C-6His)

Alternative Name: Cathepsin L1, Major excreted protein, p39 cysteine proteinase, Ctsl1,

## **Description**

Source: Human Cells;

Mouse Cathepsin L is a lysosomal cysteine proteinase which is a member of the peptidase C1 family. This protein is a dimer composed of disulfide-linked heavy and light chains, both produced from a single protein precursor. Cathepsin L plays a major role in intracellular protein catabolism. Its substrates include collagen and elastin, as well as alpha-1 protease inhibitor, a major controlling element of neutrophil elastase activity. Cathepsin L has been implicated in several pathologic processes, including myofibril necrosis in myopathies and in myocardial ischemia, and in the renal tubular response to proteinuria.

## **Product Info**

**Amount:** 500 μg / 50 μg

Content: Supplied as a 0.2 µm filtered solution of 20mM Tris, 150mM NaCl, pH 8.0

Amino Acid: Recombinant Mouse Cathepsin L is produced by our Mammalian expression system and the target

gene encoding Thr18-Asn334 is expressed with a 6His tag at the C-terminus.
