## 32-6396: IGF1 Human, V44M

Alternative Name: Somatomedin C, IGF-I, IGFI, IGF1, IGF-IA, Mechano growth factor, MGF.

## **Description**

Source: Escherichia Coli.

Sterile Filtered White lyophilized (freeze-dried) powder.

The somatomedins, or insulin-like growth factors (IGFs), comprise a family of peptides that takes part in mammalian growth and development. IGF1 mediates various growth-promoting effects of growth hormone (GH; MIM 139250). Early studies showed that growth hormone did not directly stimulate the incorporation of sulfate into cartilage, but rather acted through a serum factor, termed 'sulfation factor,' which later became known as 'somatomedin' (Daughaday et al., 1972). 3 main somatomedins have been characterized: somatomedin C (IGF1), somatomedin A (IGF2; MIM 147470), and somatomedin B (MIM 193190) (Rotwein, 1986; Rosenfeld, 2003).

IGF1 V44M Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 70 amino acids and having a molecular mass of Approximately 7.7 kDa. The IGF1 V44M is purified by proprietary chromatographic techniques.

## **Product Info**

**Amount :**  $50 \mu g / 100 \mu g$ 

**Purification:** Greater than 95.0% as determined by SDS-PAGE.

IGF1 V44M Lyophilized from a 0.2 µm filtered concentrated solution in 20mM PB, pH 7.0, 150mM

NaCl.

Content: It is recommended to reconstitute the lyophilized IGF1 V44M in sterile 18M Omega -cm H2O not

less than 100µg/ml, which can then be further diluted to other aqueous solutions.

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of

Storage condition: time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid

multiple freeze-thaw cycles.

Amino Acid: GPETLCGAEL VDALQFVCGD RGFYFNKPTG YGSSSRRAPQ TGIMDECCFR SCDLRRLEMY.
