

32-6642: ACPH Human, Sf9

Alternative Name : Acid Phosphatase, Prostate, Thiamine Monophosphatase, Ecto-5-Nucleotidase, 5-Nucleotidase, EC 3.1.3.2, TMPase, 5-NT, Prostatic Acid Phosphatase, Prostatic Acid Phosphatase, EC 3.1.3.5, ACP-3, ACP3, PAP.

Description

Source: Sf9, Baculovirus cells.

Sterile Filtered colorless solution.

Acid phosphatase, prostate (ACPP) is a non-specific tyrosine phosphatase, which dephosphorylates a varied number of substrates under acidic conditions (pH 4-6) including alkyl, aryl, and acyl orthophosphate monoesters and phosphorylated proteins. ACPH has lipid phosphatase activity and inactivates lysophosphatidic acid in seminal plasma.

ACPP produced in Sf9 Baculovirus cells is a single, glycosylated polypeptide chain containing 360 amino acids (33-386 a.a.) and having a molecular mass of 41.8kDa (Migrates at 40-57kDa on SDS-PAGE under reducing conditions).

Product Info

Amount : 2 µg / 10 µg

Purification : Greater than 95.0% as determined by SDS-PAGE.

Content : ACPH protein solution (0.5mg/ml) contains Phosphate Buffered Saline (pH 7.4) and 10% glycerol.

Storage condition : Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
