32-13060: BTN3A1 Human

Butyrophilin Subfamily 3 Member A1, BTF5, DJ45P21.3 (Butyrophilin, Subfamily 3, Member A1),

Alternative Name: Butyrophilin, Subfamily 3, Member A1, CD277 Antigen, BTN3.1, BT3.1, CD277, Butyrophilin subfamily

3 member A1.

Description

Source: Sf9, Baculovirus cells. Sterile Filtered colorless solution.

Butyrophilin sub family 3 member A1, also known as BTN3A1 is a member of the immunoglobulin superfamily. BTN3A1 is composed of an extracellular N-terminal IgV as well as a membrane proximal IgC domain followed by a transmembrane domain and also a cytoplasmic tail. BTN3A1 participates in T-cell activation and also in the adaptive immune response. Furthermore, BTN3A1 regulates the proliferation of activated T-cells & the release of cytokines and IFNG by activated T-cells. BTN3A1, Mediates the response of T-cells to infected as well as transformed cells which are categorized by high levels of phosphorylated metabolites, such as isopentenyl pyrophosphate.

BTN3A1 Human Recombinant produced in Sf9 Baculovirus cells is a single, glycosylated polypeptide chain containing 464 amino acids (30-254a.a.) and having a molecular mass of 51.1kDa (Molecular size on SDS-PAGE will appear at approximately 50-70kDa).BTN3A1 is expressed with a 239 amino acid hlgG-His Tag at C-Terminus and purified by proprietary chromatographic techniques.

Product Info

Amount: $1 \mu g / 5 \mu g$

Purification : Greater than 90.0% as determined by SDS-PAGE.

Content:

BTN3A1 protein solution (0.5mg/ml) contains Phosphate Buffered Saline (pH 7.4) and 10%

glycerol.

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods

Storage condition: of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or

BSA). Avoid multiple freeze-thaw cycles.
