

## 32-13468: TBC1D22B Human

**Alternative Name :** TBC1 Domain Family, Member 22B, C6orf197, Chromosome 6 Open Reading Frame 197, TBC1 Domain Family Member 22B, TBC1 domain family member 22B.

### Description

Source: Escherichia Coli.

Sterile Filtered clear solution.

TBC1 domain family member 22B, also known as TBC1D22B acts as a GTPase-activating protein for Rab family protein. The Tre-2/Bub2/Cdc16 (TBC) domain is a conserved protein motif which consists of roughly 200 amino acids and functions as a specific Rab-GAP domain. The TBC domain has more than 40 distinct TBC domain-containing proteins which have been identified in humans.

TBC1D22B Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 528 amino acids (1-505 a.a) and having a molecular mass of 61.5kDa. TBC1D22B is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques.

### Product Info

**Amount :** 1 µg / 5 µg

**Purification :** Greater than 80% as determined by SDS-PAGE.

**Content :** TBC1D22B protein solution (0.25mg/ml) containing Phosphate buffered saline (pH7.4) 30% glycerol and 1mM DTT.

**Storage condition :** Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please avoid freeze thaw cycles.
