

## 32-13509: XRCC3 Human

**Alternative Name :** X-ray repair cross complementing protein 3, RAD51-like.

### Description

Source: Escherichia Coli.

Sterile Filtered colorless solution.

Recombinant Human X-Ray Repair Cross Complementing Protein 3, also referred to XRCC3, is a member of RecA family and RAD51 subfamily. The protein takes part in homologous recombination to maintain chromosome stability and repair DNA damage. XRCC3 functionally complements Chinese hamster V79, a repair-deficient mutant that shows hypersensitivity to a number of different DNA-damaging agents & chromosomally unstable.

XRCC3 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 366 amino acids (1-366 a.a.) and having a molecular mass of 40 kDa. XRCC3 is fused to a 20 amino acid His tag at N-Terminus and purified by proprietary chromatographic techniques.

### Product Info

<b>Amount :</b>	5 µg / 20 µg
<b>Purification :</b>	Greater than 85.0% as determined by SDS-PAGE.
<b>Content :</b>	The XRCC3 solution (1mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 10% glycerol and 0.4M urea.
<b>Storage condition :</b>	Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
