## 32-17187: Recombinant human CD200R1 protein with C-terminal human Fc tag

Alternative Name: CD200R; HCRTR2; MOX2R; OX2R

## **Description**

Expression Host: HEK293

The protein has a predicted molecular mass of 49.17 kDa after removal of the signal peptide.

This gene encodes a receptor for the OX-2 membrane glycoprotein. Both the receptor and substrate are cell surface glycoproteins containing two immunoglobulin-like domains. This receptor is restricted to the surfaces of myeloid lineage cells and the receptor-substrate interaction may function as a myeloid downregulatory signal. Mouse studies of a related gene suggest that this interaction may control myeloid function in a tissue-specific manner. Alternative splicing of this gene results in multiple transcript variants.

## **Product Info**

**Amount:** 50 μg

**Purification :** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

**Content:** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants

before lyophilization.

**Storage condition:** Store at -80°C for 12 months (Avoid repeated freezing and thawing)
