## 32-17303: Recombinant human Gastrin protein with C-terminal human Fc tag

**Alternative Name: GAS** 

## **Description**

Expression Host: HEK293

The protein has a predicted molecular mass of 43.34 kDa after removal of the signal peptide.

Gastrin is a hormone whose main function is to stimulate secretion of hydrochloric acid by the gastric mucosa, which results in gastrin formation inhibition. This hormone also acts as a mitogenic factor for gastrointestinal epithelial cells. Gastrin has two biologically active peptide forms, G34 and G17.

## **Product Info**

Amount:  $50 \mu g$ 

**Purification:** The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

**Content:** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants

before lyophilization.

**Storage condition :** Store at -80°C for 12 months (Avoid repeated freezing and thawing)
